Customer:

Recommendation:

1. Machine OEM and type:
2. Component to be lubricated:
3. Approximate component dimension:
4. RPM or speed of component:
5. Ambient temperature conditions:
6. Component temperatures:
 - a. Operating
 - b. Idle
7. Environmental conditions:
8. Hours of operation:
9. Lubricant recommended by OEM:
10. Lubricant currently used:
11. Lubricant frequency:
 - a. Hours
 - b. Days
 - c. Weeks
 - d. Months
12. Estimated annual lubricant usage:
13. Nature of component failure:
14. Frequency component failure:
15. Desired improvement: (Longer equipment life, extended lube interval, reduced downtime, reduced cost...)
